

MonoNuc

A heatmap visualization for the MonoNuc model. The plot area is light blue with a vertical dashed line at x=0. The x-axis has tick marks at -250, 0, and 250. The plot shows sparse horizontal blue lines of varying lengths and intensities, indicating low signal density across the data range.

NucFree

A heatmap visualization for the NucFree model. The plot area is light blue with a vertical dashed line at x=0. The x-axis has tick marks at -250, 0, and 250. The plot shows a dense pattern of horizontal blue lines, indicating a much higher signal density compared to the MonoNuc model.
